SUBJECT

REFERRING TO

Enclosed for the permanent files of Kaiser Gypsum Company, Inc. is the permit from the Department of the Army with accompanying letter of transmittal, authorizing the construction of the conveyor belt structure adjacent to the new Seattle plant. Such permit became effective January 18, 1954.

The attention of Messrs. Bernat and Cole is directed to the conditions of the permit requiring the notification of the District Engineer when the work will be commenced, and also the requirement of notification in writing of the commencement of work, suspension of work for more than one week, resumption of work, and completion.

The permit expires December 31, 1957, unless the structure has theretofore been completed.

Any material changes in the location or plans of the proposed structure require the prompt submission to the District Engineer of revised plans, since otherwise the structure becomes illegal.
